

Keep resources clean

To the Editor,

One of our most precious natural resources is the least protected and respected. We as Canadians who care about our environment and all it provides needs to be protected and cared for before it's too late. We need to take a stand on the world stage for we share this planet with so many other species. We urge this government and its people to speak and keep our natural resources clean and protected. For all that depend on it to provide life.

We, the people, will be a voice for all that can not. Treat everyone equally for these are basic human rights. Thank you kindly for listening to the people and taking measures to provide clean water and protecting the most precious resource that keeps life going for us all: beautiful water.
